Program report on the implementation of service-specific and long-term uniformity issues

GTE has participated in the IILC since 1987. Following is a listing of IILC issues and their current status:

001-TWC	(R) Uniform Provision of Calling Number Identification
002-TWC	(R) Customer Proprietary network Information Availability
003-TWC	(R) ESP/Customer Access to BOC Network Management Systems
004-TWC	(R) InterLata Transport of ONA services
005-NTWC	(R) Notification of State ONA Services
006-NTWC	(R) Maintenance of ONA Plan Reference Document
007-NTWC	(R) Guideline and Principle of Uniformity
008-TWC	(R) ESP/User Initiated Diagnostics
009-NTWC	(R) Uniform non-Geographic Access to ESP Services
010-TWC	(R) ESP Frame Relay Access to ISDN Customers
011-NTWC	(R) Uniform Access Numbers for ESPs
012-TWC	(R) Ability to Detect Break in Telco Line Within 60 Seconds
013-NTWC	(R) Proprietary Demand Information Protection
014-TWC	(R) Direct ESP Packet Connection to ISDN End Office
015-TWC	(R) Information and Delivery Mechanisms for ESP Billing
016-TWC	(R) ESP Input to The BOC Network Planning Process
017-TWC	(R) Uniform Delivery of Lineside CNI in the Near Future
018-TWC	(R) Ability to Control CNI Delivery
019-TWC	(R) Computer-Telecommunications Switch Call Control
020-TWC	(W) Sub-rate Multiplexing for Data Over Voice (DOV)
021-NTWC	(R) Systematic Approach to Uniformity of ONA Services
022-NTWC	(R) Unbundling Criteria
023-NTWC	(W) Estimating Market Demand
024-NTWC	(R) CPID Anonymity/Privacy
025-TWC	(R) ESP Access to LEC Audible Ringing for Certain Originating Calls
026-IILC	(R) Long Term Unbundling and Network Evolution
027-IILC	(R) Call Forward Busy/Don't Answer on All-Trunks-Bust Situation
028-IILC	(R) Inter-Switch SMDI
029-IILC	(R) Activation of Message Waiting Indication in non-SMDI Environment
030-IILC	(R) Message Waiting Indication: Ringback After Busy Transfer
031-IILC	(R) Switch-Computer Applications Interface (Telemessaging Applications)
032-IILC	(R) Information for ISDN Services
033-IILC	(R) Visual Message Waiting Indicator
034-IILC	(R) Call Busy/Call idle Audio/Video Message Application
035-IILC	(R) Clarification of BSA Definitions
036-IILC	(R) Local Calling Area Abbreviated Dialing Access to Information and Enhanced Services

037-IILC	(R) ESP Provision of Call Control
038-IILC	(R) Call Forwarding Control Capabilities for End Users and ESPs
039-IILC	(R) ESP Needs for OSS Capabilities associated with End-User Complementary Network services
040-IILC	(R) Abbreviated Call Forwarding Activation
041-IILC	(R) Delivery of Billing Information and Called Number to ESP Utilizing Non-Access Dialing Format
042-IILC	(R) Call Transfer for ESP Lines with Called Number Identification
043-IILC	(W) Call Screening and Intercept
044-IILC	(W) Advanced Intelligent Network (AIN) Access by Non-LEC Resource Element **(NIF 0004)**
045-IILC	(R) Series Circuits on Selected Telemessaging Subscribers
046-IILC	(R) Delivery of Intra-Lata (NPA) 555-XXXX Dialed Calls to Service Provider **(NIF 0005)**
047-IILC	(R) Call Forward - Transfer Back
048-IILC	(R) Client Controlled Call screening of a Forwarded Line
049-IILC	(R) AIN/IN Trigger Usage in a Multi-Provider Environment **(NIF 0006)**
050-IILC	(W) AIN/IN Trigger Provisioning in a Multi-Provider Environment **(NIF 0007)**
051-IILC	(W) Guidelines for access to Operations, Administration, Maintenance and provisioning (OAM&P) functionalities in a Multi-Provider Environment **(NIF0008)**
052-IILC	(R) Definition and Criteria for Placement of Logical Interconnection Mediation Function **(NIF 0009)**
053-IILC	(W) Guidelines for Mediation among Multiple Service and Network Providers **(NIF 0010)**
054-IILC	(W) Management of Network Interactions Among Multiple service Providers
055-IILC	(R) ISDN Information for ESPs **(NIF 0011)**
056-IILC	(W) Identify and Define Specific Mediation Functions for "Create-Call" **(NIF 0012)**
057-IILC	(R) ESP Guide to AIN Service Development

(A) Active
(P) Provisional
(I) Inactive
(W) Withdrawn
(H) Hold
(T) Tabled
(R) Resolved

On January 1, 1997 the IILC was combined with the Network Operations forum (NOF) and the Industry Carrier Compatibility Forum (ICCF) to become the Network Interconnections and Interoperability Forum (NIIF). All of the IILC issues were assigned tot he Network Interconnection/Architecture Committee (NIAC) of the NIIF for

completion and the new NIIF issue numbers assigned tot he former IILC issues are highlighted in **bold** above. Also, any new ESP issues will be brought to the NIAC for acceptance/resolution under the NIIF Principles and procedures. The former IILC's "systematic Application to Uniformity of ONA Services" process has been incorporated into the NIIF Principles and Guidelines to use as guidelines in the resolution of future ESP service requests. The IILC/NIIF recommends that ESPs with an identified need for the service utilize the final issue documentation as a guide when requesting the capability from individual LECs. This process will assist the ESP in obtaining the capability in a uniform manner.

GTE has actively participated in the resolution of uniformity issues in the past and will continue to do so.

Billing Information

GTE provides the following ONA services that supply network information that may be useful to ESPs in billing their customers:

- Called Directory Number Delivery via DID
  Calling Billing Number Delivery - FG B Protocol
  Calling Billing Number Deliver - FG D Protocol
  Calling Directory Number Delivery - via ICLID
  Massage Desk ("SMDI")
  Call Detail Recording Reports - Packet

Operations Support Systems (OSS) Services

GTE has yet to see any market demand for "direct" access to OSS by ESPs.
GTE enhanced service personnel currently use the same 'form of access' for ordering and repair of network services that is provided to unaffiliated ESPs. If GTE decides to provide "direct" access to OSS for its ESP, or if requests from unaffiliated ESPs meet the Commission's assessment criteria for ONA services, then GTE will develop, provision, and tariff such access in accordance with the CEI principles addressed in GTE's ONA Plan.

A list of BSEs that GTE uses in its provision of enhanced services.

GTE currently uses the following BSEs for the provision of its enhanced services:

Message Desk (SMDI)
Message Waiting Indicator - Activation (Audible)
Multiline Hunt Group - Uniform Call Distribution Line Hunting
Multiline Hunt Group - UCD With Queuing
Three Way Call Transfer
Uniform 7 Digit Access Number - Remote Call Forwarding
Message Waiting Indicator - Activation (Audible Ring Burst)

DOCKET NO. 92-256

DOCUMENT OFF-LINE

This page has been substituted for one of the following:
o This document is confidential **(NOT FOR PUBLIC INSPECTION)**

o An oversize page or document (such as a map) which was too large to be scanned into the ECFS system.

o Microfilm, microform, certain photographs or videotape.

● Other materials which, for one reason or another, could not be scanned into the ECFS system.

The actual document, page(s) or materials may be reviewed **(EXCLUDING CONFIDENTIAL DOCUMENTS)** by contacting an Information Technician at the FCC Reference Information Centers) at 445 12th Street, SW, Washington, DC, Room CY-A257. Please note the applicable docket or rulemaking number, document type and any other relevant information about the document in order to ensure speedy retrieval by the Information Technician
